

# Miami University's Data Literacy Institute

Analyzing Retention Rates through Different Lenses

## Project Overview – Student Success Measures

- KPI of Choice: Retention Rate
- Curated Data Set: Full-Time, First-Time cohorts as reported to IPEDS for past three years.
- Primary Focus for Each Group
  - Group One: First Generation & Pell Eligibility
  - Group Two: Initial Major & Academic Division
  - Group Three: Gender & Race/Ethnicity
- Freedom to Add Layer for Each Group

## **DLI Sponsor**

Padma Patil - Associate Vice President; Institutional Research & Effectiveness

## **Group 1**

Becki Bleikamp – Senior Associate Director; Student Success Center

Dana Cox - Associate Provost for Faculty Affairs

Cory Duchesneau – Assistant Director; Farmer School of Business Academic Advising

Brian Kirkmeyer – Senior Assistant Dean for Student Success; College of Engineering and Computing

Gary Ritz – Associate Director; Rinella Learning Center

Katie Wilson – Director; Armstrong Student Center

## **Group 2**

Amy Bergerson – Associate Provost & Dean for Undergraduate Education

Gwen Fears - Assistant Vice President for Student Life – Assessment, Planning, and Transition

Tim Kuykendoll – Data & Planning Analyst; College of Arts and Science/Office of Research & Innovation

Gretchen Radler – Data & Planning Analyst; College of Creative Arts

Hiram Ramirez – Senior Director, DEI Strategic Initiatives; Office of Institutional Diversity & Inclusion

Sherrill Sellers – Associate Dean & Professor; College of Education, Health, & Society

## **Group 3 Members**

Laura Anderson – Associate Lecturer; Department of Mathematics

Roger Justus - Data Services Librarian; King Library

Michael Light – Associate Director; Institutional Research & Effectiveness

Sarah Meaney – Associate Director of Residential Academic Initiatives

Chelsia Potts – Assistant Dean for Undergraduate Education

Ellen Yeziarski – Director & Professor; Center of Teaching Excellence

## Retention Rates by Group

Miami University's overall rate of retention is high (90%).

Students who are Pell-Eligible (PE) or First Generation (FG) are less likely to be retained (88% and 85% respectively) than their counterparts who are neither (91%).

Those who are both Pell-Eligible and First Generation have an even lower likelihood of being retained (81%).

Group	Oxford Campus Retention Rate
Neither PE nor FG	91%
All Students	90%
<b>Pell-Eligible</b>	<b>88%</b>
<b>First-Gen</b>	<b>85%</b>
PE and FG	81%

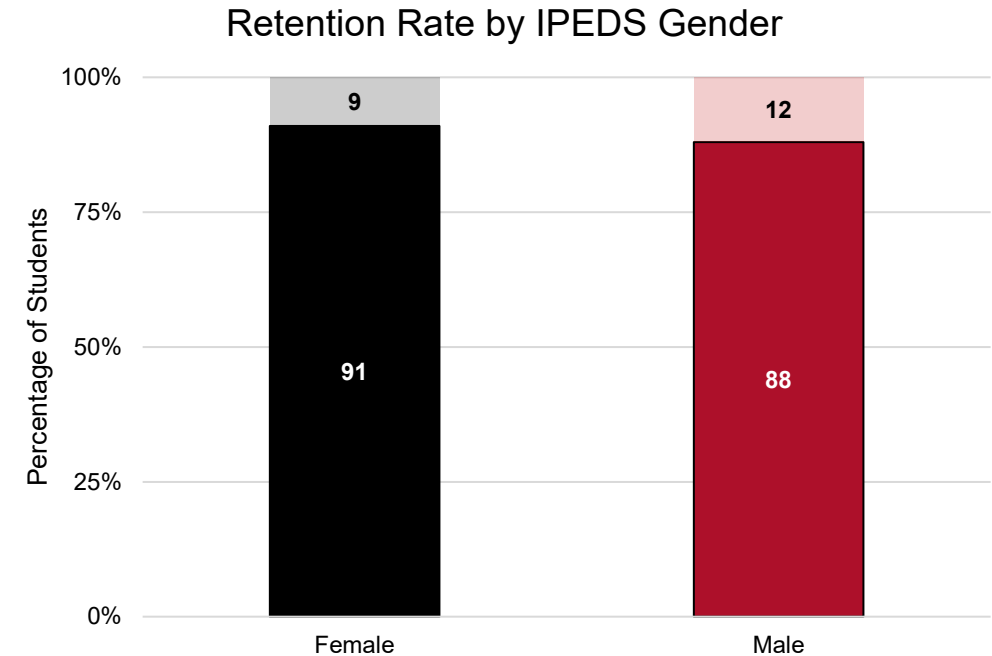

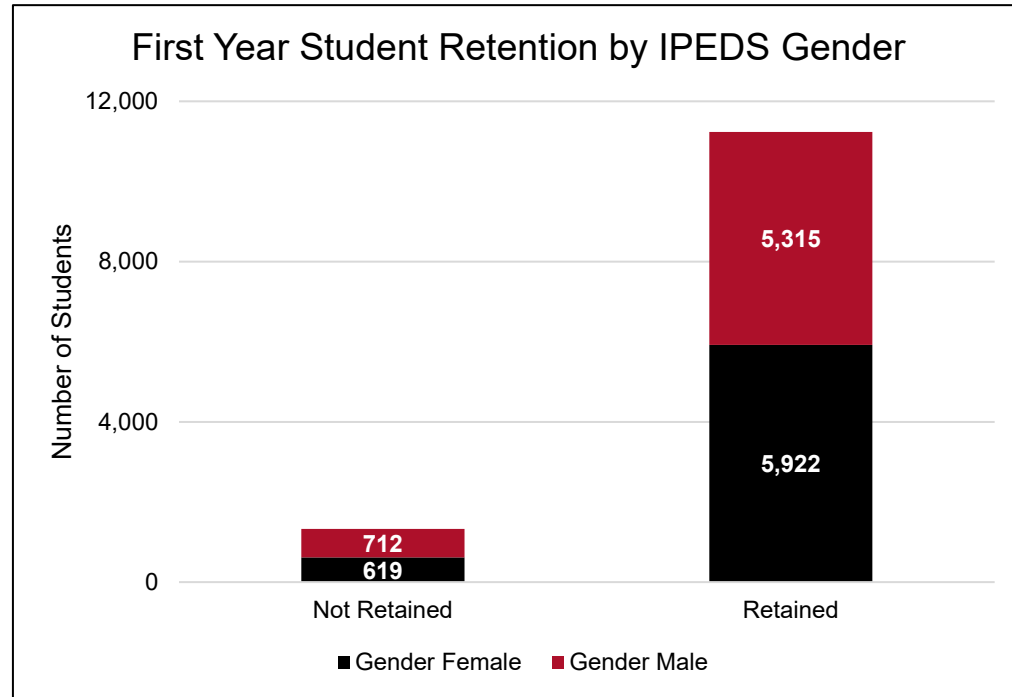

Division	Major Name	FirstYrRetention	Cohorts Total	
Arts and Science	Geology	100.0%	18	Top3
	Speech Path & Audiology	94.9%	138	Top3
	Public Administration	94.4%	18	Top3
	Economics	78.8%	85	Bottom3
	English: Literature	78.8%	33	Bottom3
	Media and Culture	77.8%	45	Bottom3
	<b>CAS Total</b>	<b>87.6%</b>	<b>5,090</b>	
Creative Arts	Communication Design	94.4%	54	Top3

	Business Economics	90.1%	547	Bottom3
	<b>FSB Total</b>	<b>92.1%</b>	<b>3,536</b>	
		<b>89.5%</b>	<b>12,367</b>	

## Retention Rates by Major

- Overall average retention rate for the institution - 90%
- Farmer School of Business (FSB) - bottom three majors are above the overall retention rate for the institution
- All other divisions bottom majors fall below the institution's retention rate
- FSB and College of Creative Arts (CCA) were above the institution's retention rate

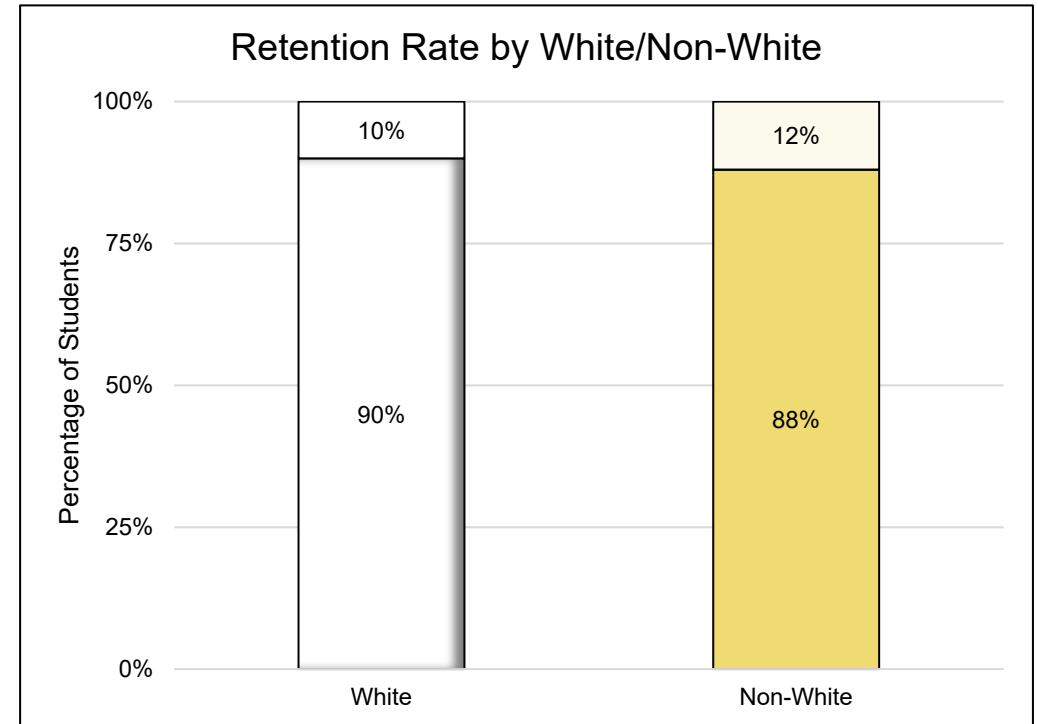

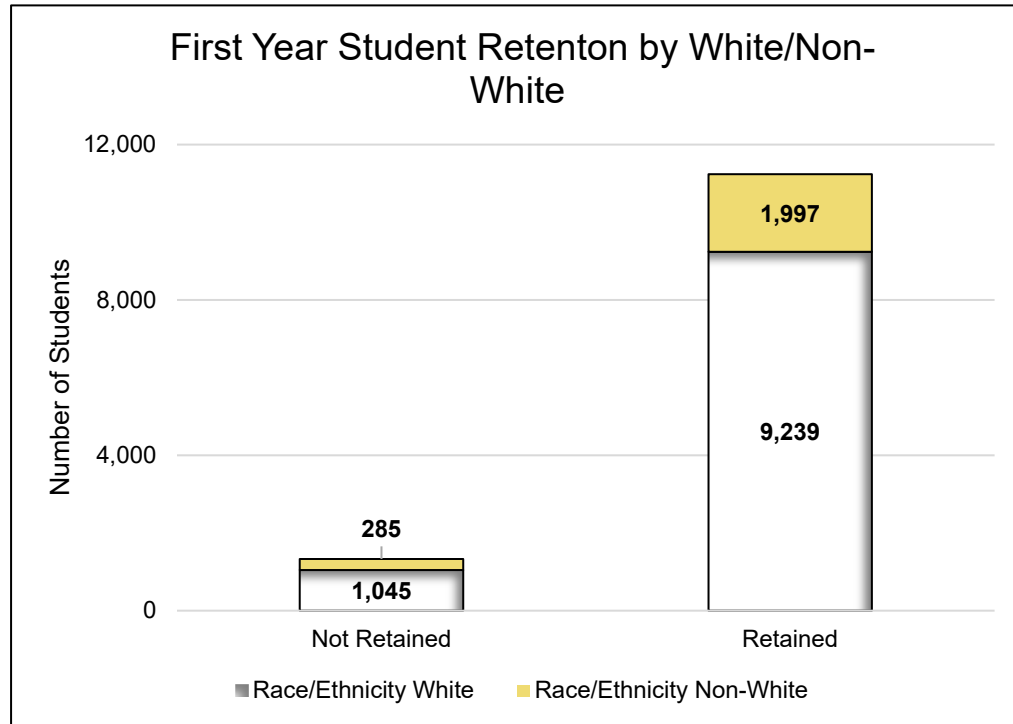

## Retention by IPEDS Gender

Two-way contingency table analysis yielded a statistically significant but *weak* relationship between Retention and Gender (only 4% variance shared)

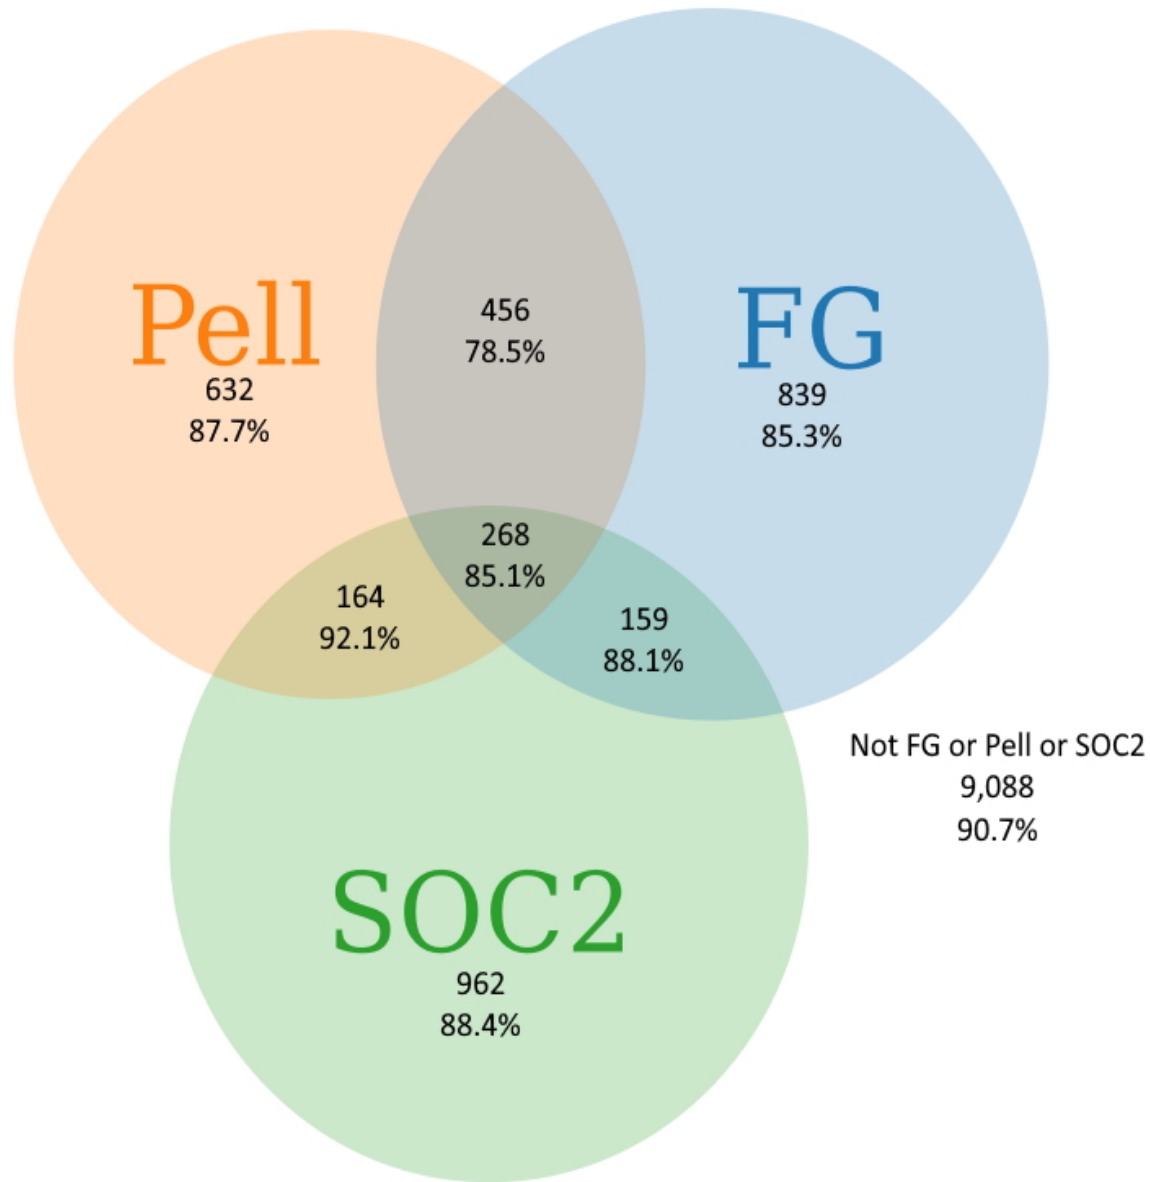

## Retention by IPEDS Race/Ethnicity

- Two-way contingency table analysis yielded a statistically significant but *weak* relationship between Retention and Race/Ethnicity (only 3% variance shared)
- The variability in retention is not shared with either gender or race/ethnicity categorizations of students.
- **Need an examination of constructs and metrics that are more deeply associated with retention and student success, such as belongingness.**

## Overall Retention through an Intersectional Lens

- First-generation status (FGS), Pell eligible, and students of color (SOC2, does not include Asian students) had an 85.1% retention rate versus students not holding these identities are at 90.7%.
- The lowest retention rate at the institution are FGS and Pell-eligible students with a retention rate of 78.5%.
- FGS and Pell-eligible students at all divisions had the lowest retention rates, except for CCA (90.9%)

Overall average retention rate for the institution - 89.5%

## Retention of First Generation and Pell by Division

- Miami University's overall rate of retention is high (90%).
- Students who are Pell-Eligible (PE) or First Generation (FG) are less likely to be retained than those who are not, across all Oxford divisions.
- In FSB, First Gen students are less likely to be retained than those who are Pell-eligible, which is the opposite of the other four colleges.
- In the College of Creative Arts (CCA), PE students are retained at a lesser rate than those who are both PE and FG which is the opposite of the other four colleges.

# Students who completed less than 67% of attempted credit hours in First Year

## Retention Rate by Division

Of those who do not complete 67% of their coursework, retention rates dip far below the university and divisional average with high variability between divisions.

Even though CEC had higher percentages of non-completing students their retention rates were stronger than other divisions for some groups.

Lack of consistency requires more data.

# Retention Rate for Students Who Earn Below a 2.0 in 1<sup>st</sup> Academic Year

Even though First Gen students outperformed others in CAS and CCA, students with low GPAs there were less likely to be retained than those in almost every other group.

In CEC and EHS, the retention rates for first generation students (whether PE or not) far exceed the retention rates of others.

FSB retains students who are neither PE nor FG at a higher rate, although their first generation students who are not PE are retained at a similar, though lower, rate.

## Data Literacy Wrap Up Meeting

- Energy around Collaboration
- Need for Further Study
  - Satisfactory Academic Progress
  - Possible Constructs Associated with Retention
- College-Ready Students VS Student-Ready College
